PROFESSIONAL SUMMARY

Full Stack Tech Lead with 8+ years building web applications end to end: React and TypeScript frontends, Node.js and Express.js REST APIs, and PostgreSQL and MongoDB data layers. Currently lead 5 engineers at Aristocrat, owning architecture across a full-stack internal platform serving 40+ studios and high-traffic iGaming front ends. Previously delivered enterprise airline applications for clients in Dubai and Norway, supporting 5,000+ concurrent users. Experienced in micro-frontend architecture, CI/CD and test automation.

CORE TECHNICAL SKILLS

Backend: Node.js, Express.js, REST API design
Frontend: React, TypeScript, JavaScript (ES6+), Redux, Angular, PixiJS, Vite
Databases: PostgreSQL, MongoDB, SQL
DevOps & Cloud: GitLab CI/CD, Jenkins, GitHub Actions, Azure
Testing: Jest, Jasmine, Karma, TDD
Styling & Tools: Tailwind CSS, CSS3, Bootstrap, Git, GitHub Copilot

PROFESSIONAL EXPERIENCE

Tech Lead | **Aristocrat, India** *June 2023 – Present*
Stack: React, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, PixiJS, GitLab CI/CD

- Lead a team of 5 full-stack engineers, owning architecture, technical decisions, code reviews, code quality, and delivery across frontend and backend workstreams.
- Designed and built a full-stack internal platform (React, Node.js, Express.js, MongoDB) for centralized storage and management of game mathematics files, used across 40+ studios.
- Engineered REST APIs with Node.js, Express.js, and PostgreSQL to power backend operations and serve data to React frontend components.
- Architected high-traffic iGaming front ends in React, TypeScript, and PixiJS for scalability, performance, and maintainability.
- Delivered interactive HTML5 mini-games in PixiJS and TypeScript, contributing to a 30% increase in player revenue.

Senior Software Engineer | **Coforge, India** *March 2021 – May 2023*

- Delivered enterprise airline applications in React, Angular, and TypeScript for clients in Dubai and Norway, supporting 5,000+ concurrent users with high availability.
- Architected micro-frontend solutions, reducing cross-team dependencies and accelerating feature delivery.
- Automated CI/CD pipelines with Jenkins, adding automated test stages to improve deployment efficiency and software quality.
- Built role-based dashboards, complex workflows, and reusable component libraries; optimized frontend performance and architecture for maintainability.

Software Engineer | **Rovi91 Innovations, India** *Nov 2019 – March 2021*

- Developed and maintained large-scale e-commerce and payment platforms, including Paytm FASTag and global marketplaces (Amazon IN, Flipkart), using Angular, TypeScript, and JavaScript.
- Modernized legacy frontend codebases, improving performance by approximately 30% through optimized Angular change detection and rendering.
- Reduced operational errors by 20% through improved UI state handling, form validation, and structured error handling.

Software Engineer | **StompMarket Technologies, India** *May 2018 – Oct 2019*

- Developed C# REST APIs handling data processing and business logic for e-commerce workflows, consumed by Angular frontends.
- Built a shared Angular component library that reduced feature development time by 30% and enforced consistent UI standards across products.
- Championed structured code reviews and testing practices, reducing production issues by 25 to 30%.

Web Designer, Wonderpillars Technologies, India *Sep 2017 – Nov 2017*

- Improved usability of government websites using HTML5, CSS3, Bootstrap, and JavaScript.

EDUCATION

Master of Computer Applications (MCA) | Guru Gobind Singh Indraprastha University, Delhi *Aug 2014 – July 2017*
Bachelor of Computer Applications (BCA) | Maharishi Markandeshwar University, Ambala *Sept 2011 – July 2014*
